The chart displays the weekly number of new cases across seven regions from 2020 to 2025. The regions are: +VU (brown), +RU (orange), +MU (red), +GU (yellow), +EU (dark blue), +CU (light blue), and +AU (teal). The y-axis represents the number of cases, ranging from 0 to 160. The x-axis shows the years 2020, 2024, and 2025. A major peak in +GU cases is observed in early 2020, reaching nearly 140 cases. Following this, there is a period of low activity. A significant resurgence occurs in 2024, peaking in mid-year with +GU and +VU being the primary contributors. Activity remains elevated through 2025.
